CHUCK E. CHEESE'S
summer of FUN

SHOW 4 2017

PLAY DATES
JUNE 19 – AUGUST 20

It may be hot outside, but everybody knows there's nowhere cooler than Chuck E. Cheese's for the summertime and this summer is sure to be the most fun of all! As we continue to celebrate 40 Years Of Fun, we have selected more fun t music videos from the past 4 decades which is how long Chuck E. has been bringing the fun! This show contains music from artists such as Kool & The Gang, Lionel Richie, The Backstreet Boys, Kelly Clarkson and many more.

Another exciting addition to this show is the new, "Fun Check" video. Once an hour, the video will interrupt the show informing guests that it is time for the "Fun Check." When the announcer says, "Fun Check" you respond with whatever you'd like. It can be a shout, a cheer, a hoot, a holler, anything to show our guests, (and more importantly ourselves) that we are having fun in what we do! Reach out to your District Ambassador of Fun to find out if there are any Fun Checks that are specific to your district or region. If not, ***now is the time to create one!*** If you need a suggestion, we recommend throwing your hands in the air and shouting out a joy-filled, "WOO-HOO!"

Thanks again for all your hard work. Have a great Summer of Fun! Below are the show release dates for the rest of 2017:

- **Show 4 – June 19 thru August 20**
- **Show 5 – August 21 thru October 1**
- **Show 6 (Chucktober) – October 2 thru October 31**
- **Show 7 – November 1 thru November 19**
- **Show 8 (Holiday) – November 20 thru January 3, 2018**

AUDIO STANDARDS

The enclosed show will have a volume level difference of 10 dBs between the Live/Birthday shows and the regular show. During non-peak times, the volume can be adjusted between 70 dBs and 80 dBs for the regular show. The General Manager and Technical Manager will use their discretion to determine the correct non-peak volume. The show volume should not drop below 70 dBs or be higher than 80 dBs during non-peak times. During peak hours, the volume will be set to the standard, which is 80 dBs during regular show and 90 dBs during Live/Birthday show. Below are instructions to your Technical Managers on how to properly set and calibrate the amps for this new setting. Once the amps have been set, it is imperative that amps are not adjusted.

Step 1: Make sure you have the proper sound meter and it is set to *Weight C* and *Reaction Slow*. This must be done in the morning when there is no ambient noise.

Step 2: For Studio C, have the control panel set at 100%. For all other shows, have the volume adjustment set to its highest level.

Step 3: On the Live/Birthday shows, adjust your amp until your sound meter reads about 90 dBs.

Step 4: Confirm your regular show is about 80 dBs in the show room and game room.

Step 5: Once you have confirmed the settings, remove the amp knobs if possible. If you cannot remove the knobs, then find a way to make it difficult to randomly adjust the knobs. If none of the above can be done, then mark the proper volume level on your amp.

Step 6: Unplug the sense microphone(s) from the back of the Symetrix.

Step 7: On the next directional, go over the volume settings with the managers.

With the new settings, the loudest the show will go is about 90 dBs. If you have any questions, please get in contact with your DT or RT.

Chuck E. Cheese's Show 4 - 2017
